EXECUTIVE SUMMARY

Kaylas.cloud is in solid shape this week with a 70/100 health score — pages load in just 34ms and your SSL certificate is valid for another 84 days, so visitors are getting a fast, secure experience. We've also spotted that SPF and DMARC email protections aren't set up yet, and we're proactively getting those in place to shield your domain from spoofing and spam.

WEEKLY FINDINGS — WHAT / WHY IT MATTERS / WHEN TO FIX

● Website availability

Why it matters: Your site answered every check — customers can browse and buy without

When: No action

Fix: —

● SSL active (84 days remaining)

Why it matters: The padlock keeps customer data encrypted and browsers

When: Renew before

Fix: Set a reminder 30 days

● SPF and DMARC record missing

Why it matters: Anyone can send forged emails that look like they come from your domain. Customers who receive fake 'invoices' blame

When: Within 7

Fix: TXT @ v=spf1 include:your-email-provider.com -all TXT _dmarc v=DMARC1; p=reject;

● Fast response (34ms)

Why it matters: Pages load almost instantly — visitors stay, browse longer, and buy

When: No action

Fix: —

● DNSSEC not enabled

Why it matters: Without DNSSEC, attackers on the same network can silently redirect your visitors to a fake version of your site. Banks and enterprises consider it

When: Within 30

Fix: Enable DNSSEC in Hostinger/Cloudflare DNS panel (one click), then add the DS record at your
