EXECUTIVE SUMMARY

Your website is in great shape this week, earning a strong 92/100 health score with a quick 669ms load time that keeps visitors happy. We're also staying ahead of threats for you — your SSL certificate is valid for another 67 days, and your SPF and DMARC protections are fully active, keeping your site and email safe from spoofing and phishing.

WEEKLY FINDINGS — WHAT / WHY IT MATTERS / WHEN TO FIX

● Website availability

Why it matters: Your site answered every check — customers can browse and buy without interruption.

When: No action needed

Fix: —

● SSL active (67 days remaining)

Why it matters: The padlock keeps customer data encrypted and browsers trusting.

When: Renew before expiry

Fix: Set a reminder 30 days ahead.

● Email authentication verified

Why it matters: Invoices and order emails reach customer inboxes instead of spam — protects revenue and brand.

When: No action needed

Fix: —

● Slow response (669ms)

Why it matters: Every extra second of load time loses roughly 7% of visitors — slow pages quietly kill sales.

When: Within 2 weeks

Fix: Enable caching / CDN; compress images.
